

I authorize my medical records to be released to the Lake Martin Humane Society in order to provide necessary information for adoption.

If you rent or lease your home, you must be prepared to give the name of the leasing office or manager. We only adopt pets into homes where pets are allowed.

Is there a chance I can be denied an adoption?

Yes. The adoption counselor will deny an adoption if there is any doubt that the potential adopter will provide inadequate care to the pet. Our main responsibility lies with the animal. We seek adopters who are financially able to care for the pet and who are committed to caring for the pet for its natural life span. Our goal is to place animals in homes where their physical and emotional needs will be met. We place animals as companions. We will not knowingly adopt an animal to the following types of people: those with a documented history of animal abuse or neglect; those planning to use an animal for the purpose of vivisection, experimentation, cult rites, or blood sports; and those planning to use an animal for any food purposes.
